

MEDTECH / PHARMA / LIFESCIENCE

TECHNOLOGY

Due to the change in age structure as well as in the people's awareness paying more attention to their health, medical technology is becoming evermore important as a link between the technical and medical sector.

Strama-MPS responds to this need within the Technology Unit and offers versatile solutions with its services.

Services

- We develop and manufacture automated assembly and testing systems for the production of medium to large quantities in clean rooms
- Production of individual parts up to small and medium batch sizes on our extensive machine park
- Assembly and commissioning of mechatronic assemblies and components

Competencies

- Consistent Good Engineering Practice (GEP) for order processing
- V-Model as basis
- Validation and qualification (DQ, IQ, OQ, PQ, FAT & SAT) based on a validation master plan
- Implementation of valid standards (e.g. EU-GMP guide, GAMP 5, FDA 21 CFR part 11)
- Active change management
- Complete traceability matrix for logical traceability
- GMP-compliant documentation

You benefit from our intensive focusing on special expertise in

- FMEA
- Risk analysis
- Quality assurance
- Data analysis
- Plant simulation
- Line Data Server with MES Integration

” *Medicine should not only give years to the life, but also life to the years.*

Georg Christoph Lichtenberg
